

VAYRO

Rent anything that moves.

The trusted peer-to-peer marketplace for cars, RVs, boats, motorcycles, trailers and adventure vehicles.

INVESTOR DECK · AUGUST 2026

THE PROBLEM

Adventure inventory is fragmented. Trust is thinner.

Renters jump between category-specific platforms. Owners navigate inconsistent tools, fees, verification and payout systems.

Too many marketplaces

Cars, RVs, boats and powersports live in separate ecosystems—creating repeated onboarding and weak cross-category discovery.

Idle assets, hard operations

Owners need availability, messaging, approvals, earnings and payouts in one operating system.

Trust is the bottleneck

Vehicle accuracy, renter identity, payment integrity and future protection must work together—not as bolt-ons.

THE SOLUTION

One marketplace for every kind of motion.

Vayro combines broad adventure inventory with a unified trust, booking and owner-management layer.

12+

Vehicle categories supported

1

Identity across every category

10% / 7.5%

Standard / member renter fee

SEARCH → VERIFY → REQUEST → OWNER ACCEPTS → STRIPE CHECKOUT → TRIP → REVIEW

PRODUCT

A production MVP—not a landing page.

Live on Render with PostgreSQL persistence, server authorization and real Stripe test integrations.

Discover

Location + dates, category and price filters, favorites, saved searches

Book

Availability blocks, overlap prevention, requests, accept/decline, trips

Operate

Owner listings, photo upload, calendar, messaging, notifications, earnings

Trust

Hosted identity, vehicle verification workflow, reviews, admin controls

Monetize

Subscriptions, fee allocation, Connect onboarding, webhook-confirmed payments

MARKET WEDGE

Start where adventure demand overlaps supply.

A category-spanning platform can acquire users once and monetize them across seasons and vehicle types.

Beach + desert launch

San Diego / Southern California offers year-round cars, boats, jet skis, campers, motorcycles and off-road inventory.

Owner-led liquidity

Recruit multi-asset owners and small fleet operators before broad renter acquisition.

Cross-category LTV

A renter can book a Bronco today, a boat next month and an RV next season—inside one trusted identity.

Initial wedge, not a fabricated market-size claim. Bottom-up market sizing follows verified supply and conversion data.

BUSINESS MODEL

Marketplace take rate + recurring membership.

Owners decide who pays the fee—renter, owner or a 50/50 split—similar to seller-controlled marketplace economics.

10%

Standard marketplace fee

7.5%

Active Vayro Plus fee

\$6.99 / \$19 / \$190

Weekly / monthly / yearly Plus

Illustrative \$1,000 rental

Payment state is confirmed by signed Stripe webhooks; browser redirects never mark a booking paid.

TRUST STACK

Trust is infrastructure, not marketing copy.

Vayro minimizes sensitive-data custody and gates marketplace actions on server-verified state.

Identity

Stripe-hosted government ID + matching selfie. Vayro stores status and timestamps—not documents or SSNs.

Money

Stripe Checkout + Connect destination transfers, signed webhooks and paid-only earnings.

Inventory

Photo-source disclosure, VIN/registration workflow, availability and transactional overlap checks.

Safety roadmap

Future insurance partner, claims operations and opt-in tracker benefits after traction.

GO TO MARKET

Build density before breadth.

A city-by-city playbook designed around supply quality, repeat owners and trusted local demand.

01

Recruit

Founding owners, specialty fleets,
marinas, RV operators

02

Verify

High-quality listings, model-
accurate photos, trust readiness

03

Activate

Local adventure partnerships,
communities, referral loops

04

Retain

Plus economics, cross-category
discovery, seasonal rebooking

COMPETITIVE POSITION

Category breadth with a unified owner OS.

Vayro’s wedge is not “another Turo”—it is one identity, one owner workflow and one trust layer across moving assets.

Platform	Cars	RVs	Boats	Powersports	Unified owner OS
Category specialists	●	—	—	—	Limited
Horizontal classifieds	●	●	●	●	No booking/trust
Vayro	●	●	●	●	Yes

Competitive framing is directional; formal feature/pricing audit is a diligence workstream.

ROADMAP

From working marketplace to defensible network.

Sequence regulation, protection and hardware partnerships behind verified demand—not ahead of it.

NOW	Production MVP	Bookings · messaging · photos · admin · Stripe test stack
NEXT	Market readiness	Live Stripe · legal policies · support ops · Cloudinary · email · maps
THEN	Protection layer	Insurance partner · claims workflow · driver checks · deposits
SCALE	Network advantage	Tracker program · fleet tools · pricing intelligence · expansion

MILESTONES

What exists today. What must be proven next.

Transparent early-stage status: product and infrastructure are live; traction metrics have not yet been claimed.

Built

Live Render app · PostgreSQL · 4 migrations
· seeded inventory · role auth · booking
workflows · Stripe test Checkout/Identity

In activation

Stripe Connect owner onboarding · live-
mode keys · operating policies · production
photo storage · support process

Prove

Supply density · search-to-request
conversion · acceptance rate · paid booking
rate · repeat use · contribution margin

THE ASK

Fund a focused market launch.

Capital turns a functioning marketplace into a trusted, liquid local network.

40%

Supply + demand acquisition

25%

Trust, insurance and safety operations

20%

Product, payments and owner tooling

15%

Legal, compliance and customer support
